

Thank you for purchasing a Forge Motorsport Turbo Blanket.

Before starting installation, we recommend obtaining the appropriate safety wear such a gloves and safety glasses. The inside of the blanket may cause skin irritation so be sure to keep it away from bare skin. Please also ensure your engine is cooled down if it has recently been running.

As you remove your blanket from the packaging, ensure that it is kept clean of lubricants and oils as these can damage the insulating material. If the blanket does come in to contact with these, simply wipe away with a clean cloth.

To ensure longevity of this product, make sure the internal and external maximum temperatures of the blanket are not exceeded. These can be found on our website or by contacting us directly.

The turbo blanket has a short break-in period. During this time, it may give off a distinct odour which will dissipate after a few engine runs.

The turbo blanket will lose its flexibility over the first few heat cycles as the material cures, so once fitted it should not be removed as it can damage the blanket.

Please note: whilst our turbo blankets are non-flammable, a flame may be produced when flammable chemicals such as oil or fuel cover the blanket. When installing the blanket, please ensure that there are no leaks within the engine that may cause this to happen.

Forge Motorsport accept no responsibility for damage caused by improper use or installation of our products.

PLEASE READ INSTRUCTIONS AND/OR CHECK WITH YOUR CHOSEN RETAILER BEFORE INSTALLATION. IF NOT INSTALLED CORRECTLY DAMAGE TO YOUR ENGINE/VEHICLE MAY OCCUR

BITTE LESEN SIE BENUTZERHINWEISE UND / ODER KONTROLLE IHR CHOSEN INSTALLATEUR VOR INSTALLATION. WENN NICHT INSTALLIERT, KORREKTE SCHÄDEN MOTOR / FAHRZEUG KANN AUFTRETEN

POR FAVOR DE LEER LAS INSTRUCCIONES O VERIFICAR CON NUESTRO DISTRIBUIDORES ANTES DE LA INSTALACIÓN. SI NO ES INSTALADO CORRECTO PUEDE QUE SU MOTOR CORRA PELIGRO DE DAÑOS.

請在安裝前詳閱安裝說明書或與當地的經銷商聯絡確認安裝細項。如未按照正確步驟安裝可能會造成車輛軟硬體損失
